

CASE STUDY

DKNY, LONDON

Arena Tiling Limited has successfully completed the full wall and floor tiling installation of the London flagship store of New York leading fashion designer DKNY.

The west end London Bond Street store was fitted out over three levels to house the latest in designer fashions from Donna Karan New York.

Arena laid 900m² of 1200x600 porcelain floor tiles by Lea Ceramique which were directly imported from Italy for the project. The store also has over 50m² of the new Slim Tech 1200x600x6mm from Lea Ceramique laid to the niche wall feature. Other features include the contrasting stair tread and riser tiles which extend out for a manikin display plinth. This section was supplied and cut in house by Birmingham based Solus Ceramics.

The quality of the workmanship was commended by all involved and keeps Arena at the forefront for prestigious fit outs across the UK.
