

CASE STUDY**SHERATON PARK LANE, LONDON**

Sheraton

Arena Tiling Limited are proud to be associated with the extensive refurbishment of the 5 star Sheraton Hotel located on the Park Lane in London's west end. The order value for the tiling package was a £550k package based on the installation of 5000m² of wall tiling and 3000m² of waterproof tanking systems.

The quality of the workmanship exceeded the client and designers expectations with the project manager making the following comment:

"The quality is extremely good which is pleasing. The client and the Architect have also made the same comment"

At times the work load and the requirement for labour was extremely high. Arena having to often react by having 22 tilers onsite within a short space of time, which was an increase of 19 fitters for our core 4 man team with very little notice. This was something Arena were able to do to meet the demands on the project.

The works were undertaken in two phases and sometimes with some very tight deadlines and a moving programme, Arena were able to take this in their stride causing no issues for the fit out contractor.
